CM22

COMRAD CM22

About the radio:

Mobile 3G/LTE, Android, terminal with Comrad client software installed, complete withstandard accessories: Palm microphone, car installation kit, power cable, instruction manual.
This terminal can be used for vehicle installation (powered by the vehicle's power supply) or for permanent installation. In case of permanent installation, the terminal can be equipped with an uninterruptible power supply from a 220V network.

The reliable mobile terminal has an external microphone with a convenient PTT key, a 2.45"color touch screen that allows you to control channels and signal strength, 4 programmable keys, a 5W speaker that provides loud sound in high quality, a volume control, and an SOS button.
